CHAIRMAN MESSAGE

MR. KAMAL JAMJOOM

Since our first day of operations in 1977, we have had our goal to be pioneers in the industry to provide a better advancement in the daily life of our great nation.

Today, we have exceeded our borderlines to become an international icon that helps different societies and their dreams of a better life in the Middle East, Africa, Asia & Europe.

For that, we are proud every day of our team, leaders, and internal communities of Jamjoom Group as we continue to develop, support & believe in every member of our big family.

With that, we also pride ourselves on being able to create meaningful relations & ties with our clients & customers that are built on trust, understanding & empathy.

Welcome to Jamjoom group...

CEO MESSAGE

MR. SALEH JAMJOOM

The development witnessed by the company during the past years by providing advanced medical services from the local industry that is in line with the vision of the Kingdom of Saudi Arabia and importing the best medical products from around the world. We will continue on the steps of the previous generations with the continuity of development that helps us to always be at the forefront.

VISION

Jamjoom Medical Solutions' vision is to be a leading provider of high-quality, innovative, and affordable healthcare solutions in the region, Jamjoom will achieve this vision by:

- Investing in the development of new & innovative medical products and services.
- Partnering with leading global healthcare organizations to bring the latest technologies and treatments to Saudi Arabia.
- Building a strong professional team that provides excellent patient care.
- Promoting public health initiatives to improve the health of the Saudi population.

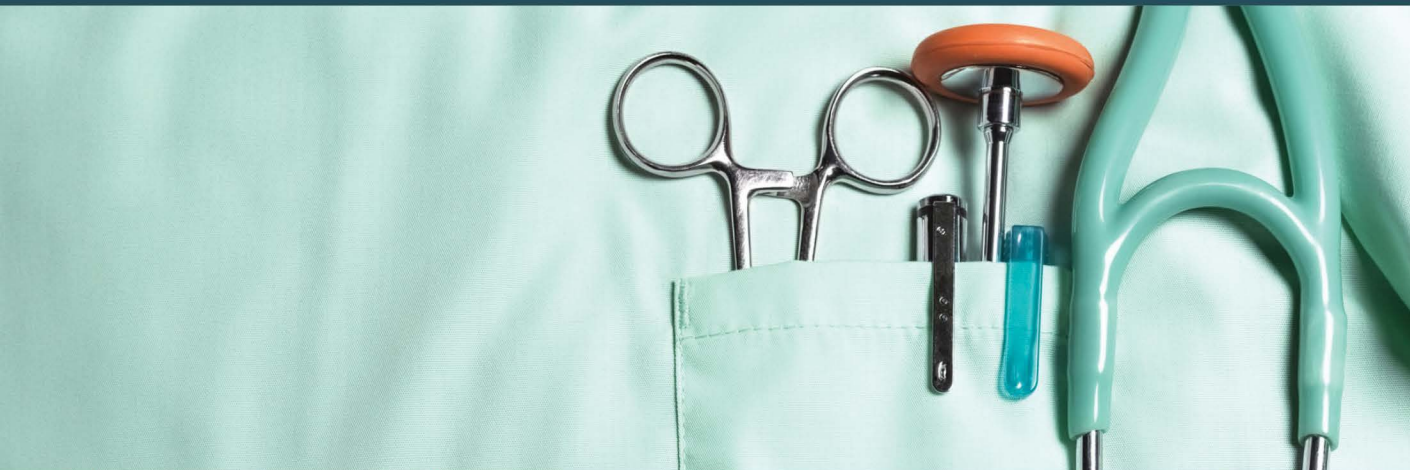

MISSION

Jamjoom Medical Solutions' mission is to supply innovative and high-quality medical products available to the community.

Jamjoom strives to be the most reliable choice for medical supplies by providing exceptional service and support to healthcare providers in Saudi Arabia, contributing to the growth and development of the region's healthcare industry, reflecting on the improvement of quality of life by bringing the utmost and most efficient technology to the healthcare system.

1 Introduction

to company and services

POWERED

by love of humanity, innovation and expertise meet at JMS to bring out unmatched high quality products to the world every day.

MOTIVATED

by over 600 employees.

APPRECIATED

For a global reach across the Middle East, Africa and Europe.

2 Manufacturing

Since 1977 and over more than 45 years JMI has the largest clean rooms in the industry with a total area of 3000 square meters class 100K, in addition to a stitching production area with 400 square meters and a sterilization area.

The production areas are listed as below:

1. Injection and Extrusion area (Clean Room)
2. Assembly Clean Room, which is divided into:
 - Assembly area
 - Face mask area
 - Packaging machines area
3. Gel mixing area
4. Stitching area
5. Sterilization area

Manufacturing

Surgical Gowns

- Excellent water repellent Breathable Spun bond melt blown material.
- Reinforced and non-Reinforced.
- All sizes, Small, medium, large, X-large, XX-large.
- Double wrapping sterilization pouches.

Surgical Procedures Packs

- Complete product range for all surgical procedure disciplines.
- Flexible and customized components to match different customer needs.
- Lint free superior quality materials.

IV & Blood Administration Sets

- Full product range including Venting & non-venting latex-free superior quality sets.
- Smart site injection sites available.
- Different burette sizes available 100ml, 150 ml.
- Syringe extension lines available for neonates and adults.

Catheter Suctions

- Straight with fingertip control / Graduated.
- Lateral eyes for maximum suction efficiency.
- Soft whistle tip for easy smooth insertion.
- Color-coded.

3

Medical Disposables

Vyair Medical Inc. is a global company, headquartered in suburban Chicago focused exclusively on supporting breathing through every stage of life. Established from legacy brands with a 65-year history of pioneering breathing technology, the company's portfolio of integrated solutions is designed to enable, enhance, and extend lives.

Limbo Breathing Circuit

The Power Of Less

- Less weight.
- Less compressible volume.
- Less patient effort.
- Less downtime.
- Less resistance.

Medical Disposable

Super Nova Nasal

PAP Device

- Rescue ventilation.
- Preoperative oxygenation.
- Relieve upper airway respiratory obstruction.
- Easy access to the oral cavity.
- Optimum ventilation during deep sedation.
- PACU reduces complications.

BMC Medical Co., Ltd. (BMC) was established in Beijing, China in 2001, was built to partner with families worldwide to overcome the discomfort of chronic respiratory disease with quality products, professional services and proactive care. Over the past 20 years, BMC helps people in more than 100 countries and regions around the world to sleep better and breathe easier.

CPAP Full Face Mask

Multifunctional NIV Interface Kit

F3 with elbow «V» is able to be used with CPAP/BPAP device.

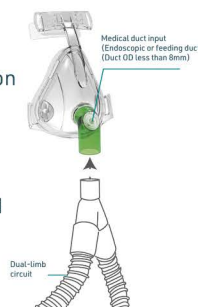

F3 with elbow «NV1» is intended to be connected with the ventilator through a single-limb circuit. In this case, an additional auxiliary venting connector is always needed, such as the swivel connector.

F3 with elbow «NV2» is designed for the dual-limb-circuit ventilation (inspiratory limb & expiratory limb).

F3 with elbow «NV3» is designed for the dual-limb-circuit ventilation as well. In addition, a medical cannula, such as the endoscopic duct, with an external diameter less than 8 mm, can be inserted through the port on the green elbow

Medical Disposable

Compatible with 4 elbow options, including v (Transparent), NV1 (Milky), Nv2 (Blue) and Nv3 (green)

One mask body plus whichever elbow configuration needed in the package provides a multifunctional NIV therapy interface kit.

Two multifunctional ports

There are two posts on the main frame of the mask for pressure test and/or additional oxygen input.

Nasal Pillows Interface

Multifunctional NIV Interface Kit

P2 Nasal Pillows Interface is a nasal mask with a minimalist design, including the headgear. Limited parts make it much easier to not only wear but also clean and assemble. It is so light and comfortable that you can hardly feel it while wearing it.

Features

- Minimalism design, light and comfortable.
- Ball-and-socket joint, convenient and flexible.
- Diffuse multi-vent holes, quiet and peaceful.

Medical Disposable

VacSax is the UK's leading supplier and manufacturer of disposable suction systems, founded in 1997.

Based in Plymouth UK, VacSax has the largest and most comprehensive product range available in the disposable suction market.

The business has an innovative and expanding product base and a strong track record of growth.

From product design through to dispatch VacSax is unrivalled in its dedication to excellence.

Vomax

simple to use and effective vomit bag with solidifying agent and without.

VacSax BactiClear®

Antimicrobial Suction Liners & Fluid Management System

The only system where all external surfaces are totally antimicrobial, designed to minimize the risk of cross-infection.

All external surfaces of the liner and canister have antimicrobial properties proven to reduce the growth of harmful bacteria such as MRSA and E.coli by 99.99% over a few hours and permanent protection after 24 hours.

Medical Disposable

Medline is the largest manufacturer and distributor of medical supplies. We focus on technologies that drive both quality and cost efficiency at every point in the supply chain. So, you can trust that you're getting the best quality products and solutions for the best possible price, serving more than 300,000 plus products in more than 125 countries with an annual turnover of 20 billion USD plus.

Medline EMPOWER Packaging

Sophisticated Process, Simple results

Medline designers together with our clinical team spent hundreds of hours in hospitals across the United States, observing and interviewing central supply managers, OR directors, nurses, scrub techs and others. Then we applied the principles of intuitive visual design to create an entirely new approach to packs: Medline's EMPOWER Packaging System.

Medical Disposable

UltraCare Adult Incontinence Briefs

- Ultra-absorbent core with odor protection wicks away fluid to promote dryness and help maintain skin integrity for long-lasting protection.
- Cloth-like outer cover provides a soft natural feeling on the skin and discreet fit.
- Skin-safe closures offer secure, repeated refasten ability.
- The moisture alert wetness indicator changes color when the garment is wet.

Helps. Cares. Protects.

For 200 years, **HARTMANN** has proudly channeled its clinical and medical expertise into smart solutions that are accessible to everyone. HARTMANN will continue to be a partner to healthcare institutions while strengthening its outpatient activities even more.

HARTMANN offers wound treatments that make health economic sense and bring simplicity to patients and caregivers' lives.

Zetuvit®

Plus Silicone Border

Superabsorbent dressing (SAP) with silicone adhesive and border.

Medical Disposable

Effective

- Reduces wound inhibitor factors (MMP activity).
- Avoids leakage and prevents periwound skin damage.

Versatile

- Suitable for moderate to high exudate levels, while maintaining optimal microclimate.
- Simple & intuitive application.

Patient-friendly

- No fear of odor and leakage.
- Atraumatic dressing changes thanks to silicone contact layer.
- Comfortable padding and protection against mechanical shocks with unique combination of cellulose and SAP.

CovaView™ IV

Transparent iv dressing

IV Clear®

Antimicrobial clear silicone adhesive securement dressing with chlorhexidine and silver

External Protection

- Barrier to external contamination
- Fluid impermeable

Antimicrobial Protection

- Transparent and breathable film with dual antimicrobials-chlor hexidine and silver, embedded in the soft silicone adhesive
- Provides antimicrobial throughout the entire surface area for up to 7 days
- Kills on average 99.99% of bacteria and yeast commonly associated with CRBSIs5

Convenient

- 2-piece liner and tabbed paper frame for easy application
- Window delivery for positioning accuracy
- Easy to apply
- All-i-one securement system minimizes training requirements

Soft Silicone Adhesive

- Allows visibility of insertion site
- Reduces pain and trauma at dressing changes
- Highly breathable, constantly transfers excess moisture

Medical Disposable

MicroSafe®
Group

MicroSafe With a Passion for Healing, The MicroSafe Group is a global healthcare leader that produces and develops best-in-class products. Our premiere Stabilized Hypochlorous Acid (HOCl) solutions and gels are utilized around the world to treat various skin conditions and wounds and as disinfectants and sanitizers.

Dermacyn® Wound Care

Antimicrobial wound-irrigation solution, Dermacyn® is the first revolutionary stable patented HOCl formulation Indicated for the treatment of all types of chronic, acute and burn wounds; Dermacyn® Wound Care irrigation solution has outstanding antimicrobial power. Dermacyn® Wound Care eliminates the unpleasant odors that often occur in infected wounds with excellent efficacy _and within just a few minutes of exposure to Dermacyn®.

The Dermacyn® Wound Care effect has been proven under clinical conditions: Hypochlorous acid (HOCl) is known to reduce microbial load, reducing the growth of microorganisms, including Staphylococcus aureus (MRSA) & Enterococcus.

MICROCYN® WOUND & BURN HYDROGEL

World's First Broad Spectrum Anti-Microbial Hydrogel Safe as Saline; Microcyn is a Broad Spectrum Anti-Microbial Hydrogel that belongs to a new class of anti-skeptics known as Super-Oxidized Solution. Microcyn is a clear, viscous, odorless, aqueous hydrogel that is pH-neutral, non-irritating, non-sensitizing, and non-cytotoxic to granulation tissue. For the treatment of all types of Chronic and Acute Wounds as well as all types of Burns.

MicroSafe® Hospital Grade Disinfectant & Sanitizer U.S. EPA Registered

The MicroSafe® Disinfectant & Sanitizer is

- EPA registered as Toxicity category IV (Non-Toxic and not an irritant)
- The most approved and most tested 100% natural technology of its kind available globally.
- The new standard in infection control, the leader in a new class of disinfectants and the most advanced disinfectant in the world.
- The result of a biotech breakthrough almost 20 years ago with unmatched properties is 100% natural and without harmful chemicals.

Medical Disposable

HELIOSCOPIE has been established in France, since 2000 where it designs, manufactures and markets class I to III implantable medical devices, specialising in the surgical or endoscopic treatment of obesity.

HELIOSCOPIE positions itself on minimally invasive and reversible techniques with devices or accessories adapted to the treatment of obesity but it more generally has expertise in the field of wall reinforcements (ventral hernia repair, hernia, etc.) or urinary incontinence.

GASTRIC CALIBRATION TUBE

HELIOSCOPIE offers a reliable, versatile and easy-to-use gastric calibration tube suitable for Gastroplasty, which brings satisfaction to our customers.

Entirely made of Silicone, it offers an excellent compromise between flexibility and rigidity to introduce itself and maintain its position in the stomach.

- Inflatable balloon at 40cc in distal position to facilitate its location in laparoscopy.
- Diameter suitable for all gastroplasties.
- Issued sterile and for single use.
- Central channel for gastric emptying or injection of control fluids.

Medical Disposable

mindray

healthcare within reach

Mindray's minimally invasive surgery solution includes both the endoscope camera system and laparoscopic instruments. By providing a high-quality imaging system, Mindray extends the function of doctors' eyes to see more details, and by providing disposable instruments and reusable instruments, Mindray extends the function of surgeons' hands to practice various deliciated operations.

Vedkang Medical is one of the leaders that develop, manufacture, and market high-quality endoscopic devices. Our product lists include ESD products, ERCP products, and basic GI endoscopic treatment products, which have been distributed to more than 80 countries worldwide.

Founded in 2003, with more than 750 employees, our mission has always been to innovate for health: to make surgeries easier and patients safer. In 2020, Vedkang Medical gained the China Science and Technology Entrepreneurship Contribution and National Model Medical Device Enterprise Award.

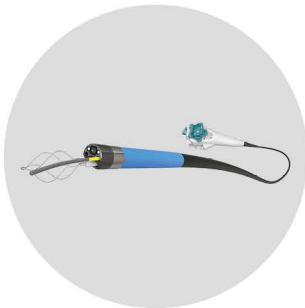

Medical Disposable

VedVision

Cholangioscope

Direct Visualization System enables direct visualization of the bile and pancreatic ducts and can help obtain biopsy specimens, lead to the diagnosis of abnormalities, and guide stone therapy.

Various functions, such as flushing, suction, lithotripsy, collection of biopsy specimens, etc., and can also be used to diagnose and treat the intrahepatic area, external bile duct, and pancreatic duct under direct visualization.

MEDICO ELECTRODES INTERNATIONAL LTD is one of the leading manufacturers of Disposable ECG Electrodes for all cardiac monitoring and diagnostic procedures. With a constant endeavor to grow, in 2015 Medico acquired 100% shares of a UK-based manufacturer of Tab Electrodes, Electrosurgical Plates, and Hydrogel. The Acquisition consisted of two manufacturing plants in Warwick, thus providing a multi-national base to the company.

With the Acquisition, we are able to offer the following range of Products

A. Disposable ECG Electrodes.

B. TAB Electrodes.

C. TENS Transcutaneous Electrodes.

D. Hydrogels adhesive gels.

MSGST-07

MSGST-35M

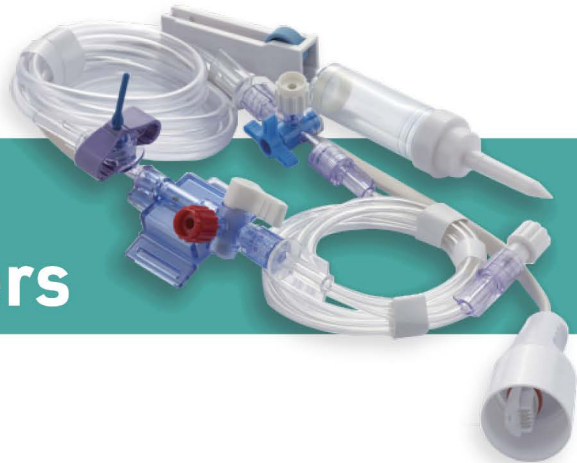

MSGLT-11

SCW MEDICATH LTD established in 1996 and headquartered in Shenzhen, is the first factory to develop and manufacture Central Venous Catheters and Pressure Transducer in China.

As a professional medical manufacturer, SCW has been specialized in the field of Intervention, Anesthesiology & Critical Care, and other high-value medical supplies.

Disposable Pressure Transducers

- Medical pressure transducers are specialized medical transducers that can sense pressure and convert it into digital or other types of output signals.
- The IBP transducer is indicated for monitoring kinds of pressure such as central venous pressure, pulmonary artery pressure, and atrial pressure to get the physiological pressure.
- Strong adaptability, can be used with monitors of major brands, such as Mindray, Philips, Draeger, GE, Space, Edward, etc.
- Complete specifications and models, including single-head, double-head and three-head.

4

Clinical Nutrition

Clinical Nutrition

Fresenius Kabi is a global healthcare company that specializes in lifesaving medicines and technologies for infusion, transfusion and clinical nutrition. The company's products and services are used to help care for critically and chronically ill patients.

KabiHelp® Pro PN Compounding Solution

- 12" Touch screen.
- Volumetric delivery, and high-precision gravimetric check with the built-in Sartorius scale.
- Macro and micro ingredient mixing.
- Air and occlusion detection.
- 24 Ports.
- Developed according to Medical Device Standards.
- GS1* barcode standard support.
- Built-in LAN and Wi-Fi interfaces.
- Supporting syringes and vial source containers.
- Endotoxin and DEHP** -free tubing.

KabiHelp® Pro

PN Compounding Solution

KabiHelp® Pro is the multi-ingredient PN mixing device elevating a contemporary compounding practice to the next level.

As the individuality of the patient matters, KabiHelp® Pro provides you with the option to create tailor-made PN admixtures and to reduce the need for manual additions.

Developed according to international Medical Device Standards, KabiHelp® Pro is an embodiment of safety and compliance in your daily work.

Clinical Nutrition

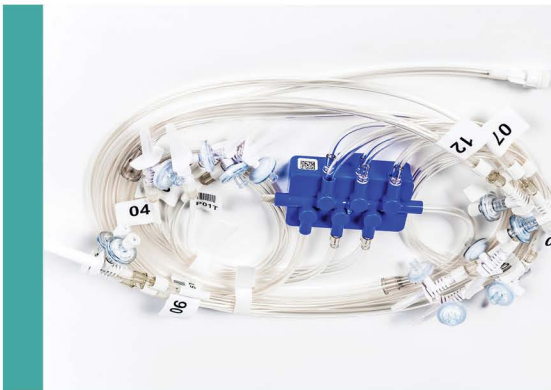

KabiHelp® Pro

Bags and Accessories

Bags One-chamber

- Available in EVA* and MultiLayer material.
- Available in sizes from 150 mL to 5000 mL.
- DEHP-free.
- Safe handling.

Transfer Sets

- Available in preassembled versions with inlet barcode on all ports.
- 24 port.
- Compatible with syringes, macro and micro source containers:
 - _ Double sterile packed.
 - _ Safe handling.

Freka® Mix

Single-chamber mixing bags for easy, safe, and precise mixing of infusion solutions

- Optimal transparency for unimpeded visual control.
- Bag material made of environmentally friendly EVA (ethylene-vinyl acetate) or EVA/EVOH (ethylene-vinyl-alcohol), a copolymer with very low gas permeability .
- The EVA bag material is PVC-free.
- Bag material with scale markings and clearly labeled injection and infusion ports .
- Can be individually labeled directly on the surface of the bag.
- Simple to transport and hang using a compatible bag hook.

Clinical Nutrition

Lipifil Air, 24

Ventilated, flat infusion filters for lipid applications and mixed solutions

- 1.2 μm PET filter membrane provides 24 hours of protection against microorganisms, spores, fungi, and particles larger than 1.2 μm .
- Large, active 13.5 cm² filter surface for particle removal.
- Reliable removal of air via the integrated air-vent system (0.03 μm PTFE) .
- Transparent filter housing.
- Small filling volume of 1.8 ml (filter housing).
- Non-fibrous.
- Pressure-resistant up to 4 bar.
- Line with Luer Lock fitting.

Medcaptain Medical Technology Co., Ltd.

was established in 2011, and its business involves Medication Delivery, Minimally Invasive Interventions, Anesthesia and respiratory, In-vitro Diagnostics and other fields.

Medcaptain is committed to leading scientific and technological innovation, constantly improving and perfecting products and solutions, so that more people can benefit from high-quality medical services.

The Integrated Perioperative Solutions Provider is closer to healthcare needs and innovates medical technologies, to provide high-quality services.

Closed Suction

Closed Suction Catheters. Depth level indicators for easy positioning of the catheter. Reducing the risk of cross-contamination and keeping the patient's high PEEP level without disconnecting the patient from the ventilator during suction.

Clinical Nutrition

EP-60 Enteral Feeding

EP-60 Enteral feeding pump. Easy to feed. Safe to use. Integrated enteral feeding system by providing enteral giving sets.

- Enteral Feeding System.
- 4.0 Touch Screen.
- Optional Heater
- Auto Anti Occlusion.
- Robust Housing.

Offer sets with ENFit or luer connector to assist you in going through the ENFit transition phase smoothly. Fully compatible with Medcaptain enteral feeding pump.

5

Medical Equipment

Medical Equipment

As high-quality and advanced healthcare in most situations is still not affordable for most people.

Mindray's believes it's time for the healthcare industry to give every life respect and put patient care first.

Innovation has been rooted in Mindray's blood since the company was founded 30 years ago, Mindray covered 110,000+ medical Institutions in China, Over 99 tertiary hospitals in China 685,940+ units Installed, 447,000+ patient monitors, representing 36+% market share.

Mindray's China Public Healthcare coverage started at 24.6% and is now 97%, Diagnosis and Treatment (annual) from 2,145 million and reached 7,800 million, Medical Institutions coverage from 290,000 - 993,000, Medical device market volume USD 8 billion and reached USD 54.4 billion.

Mindray's have a firm's experience of managing both American and Chinese researchers is revealing. Its researchers in Silicon Valley are not just tutoring their counterparts in Shenzhen, it turns out, but also learning from them.

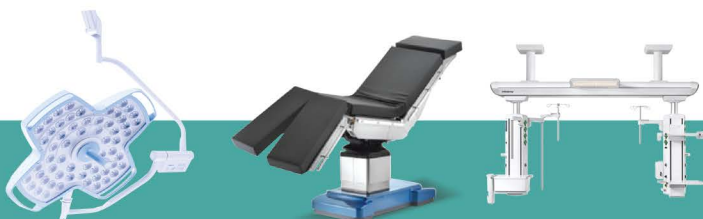

Mindray's have 8,300+ professionals employees from 40+ countries, International branches in 30+ countries, with 44 branches in China, Serving 190+ countries and regions. Mindray systems are in use at 9 of the top 10 USA cardiac hospitals Mindray covers almost of medical devices worldwide which are as follows :
Patient Monitoring and Life Support, Medical Imaging Systems, vitro diagnostics, Hematology, and Surgical equipment.

- 7 Global R&D Centers.
- 2000+ Employees around the world.
- 600+ R&D Experts.

As a diverse team of scientists, medical experts, researchers and product designers, we will keep creating and developing products and technologies for medical applications. Delivering accurate and efficient medical solutions needed by doctors of today and tomorrow.

Medical Equipment

SonoScape's

HD-550 Processor

The one-stop, cost-effective, High-Definition Video Endoscopy System just got better.

SonoScape's HD-550 Processor

has evolved in many ways, excelling in a variety of routine and complex procedures. More versatile with the new multi-mode VIST (Versatile Intelligent Staining Technology) VIST multi-mode is interchangeable at the touch of a button, without any delay you can notice. A clear vision with Full HD output Armed with a 2-megapixel CMOS sensor, HD-550 supports 1080p resolution.

Brilliant workflow HD-550 inherits the built-in workstation with 500GB of hard disk. It allows you to access patient data, capture and record images and videos, to create and edit reports in one spot without the need for any extra software.

Bowa Medical leading full-range supplier of innovative energy-based surgical systems made in Germany, with a high level of vertical integration, a far-reaching technology mix, and dedicated engineering. In close interdisciplinary cooperation with leading universities, hospitals, and institutes around the world, we are developing new solutions for ultrasonic and **HF surgery**.

GIT and Broncho

- For monopolar argon-assisted coagulation.
- Safe working and perforation protection for every application.
- With flow-optimised atraumatic ceramic tip.
- Optimal colour contrast thanks to the dark-green colour of the sheath.
- The disposable probes are delivered sterile

Consumer
Care

Bionime was established in April 2003 with the goal of improving the lives of people with diabetes through better self-monitoring. Bionime is focused on designing and manufacturing accurate medical testing equipments.

GM260

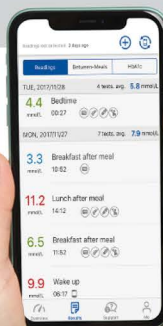

The **GM260** delivers accurate measurements of your blood glucose in just 5 seconds. A large display and auto-coding are featured in this simple and clear design, while Validus test strips ensure an easy, hygienic test experience.

Wiz plus

Built with users in mind, the **Wiz Plus** makes glucose monitoring stylish and simple. Auto-coding capability, helpful status markers and a wide HCT range make Wiz Plus the starting point for good glucose management.

Sync With Rightest CARE App

Consumer Care

RIGHTTEST iFree CGM

promises ease of use and a mobile app available for any Bluetooth device to record glucose and communicate with relatives.

- Up to days NO-Gap CGM.
- Reading every 2 Mins.
- Predicts & helps prevent highs and lows, to help increase time in range.
- Licensed for 2 years old and above.
- No Scanning Required.
- Waterproof swim, shower, bath, and exercise (IP28: 2.5 m for 60 mins).
- 1 - year rechargeable wireless transmitter.
- No gap auto recovery of data for 14 days.
- Customizable Alerts:
 - High and low alerts.
 - High and low predicted.
 - Rapid rise and fall.
- Digital diabetes management to Apps (IOS, Android), Web sites, apple watch & android watch.
- The disposable probes are delivered sterile.
