CHAIRMAN MESSAGE

MR. KAMAL JAMJOOM

Since our first day of operations in 1977, we have had our goal to be pioneers in the industry to provide a better advancement in the daily life of our great nation.

Today, we have exceeded our borderlines to become an international icon that helps different societies and their dreams of a better life in the Middle East, Africa, Asia & Europe.

For that, we are proud every day of our team, leaders, and internal communities of Jamjoom Group as we continue to develop, support & believe in every member of our big family.

With that, we also pride ourselves on being able to create meaningful relations & ties with our clients & customers that are built on trust, understanding & empathy.

Welcome to Jamjoom group...

CEO MESSAGE

MR. SALEH JAMJOOM

The development witnessed by the company during the past years by providing advanced medical services from the local industry that is in line with the vision of the Kingdom of Saudi Arabia and importing the best medical products from around the world. We will continue on the steps of the previous generations with the continuity of development that helps us to always be at the forefront.

VISION

Jamjoom Medical Solutions' vision is to be a leading provider of high-quality, innovative, and affordable healthcare solutions in the region, Jamjoom will achieve this vision by:

- Investing in the development of new & innovative medical products and services.
- Partnering with leading global healthcare organizations to bring the latest technologies and treatments to Saudi Arabia.
- Building a strong professional team that provides excellent patient care.
- Promoting public health initiatives to improve the health of the Saudi population.

MISSION

Jamjoom Medical Solutions' mission is to supply innovative and high-quality medical products available to the community.

Jamjoom strives to be the most reliable choice for medical supplies by providing exceptional service and support to healthcare providers in Saudi Arabia, contributing to the growth and development of the region's healthcare industry, reflecting on the improvement of quality of life by bringing the utmost and most efficient technology to the healthcare system.

1

Introduction

to company and services

POWERED

by love of humanity, innovation and expertise meet at JMS to bring out unmatched high quality products to the world every day.

MOTIVATED

by over **600** employees.

APPRECIATED

For a global reach across the Middle East, Africa and Europe.

2 Manufacturing

Since 1977 and over more than 45 years JMI has the largest clean rooms in the industry with a total area of 3000 square meters class 100K, in addition to a stitching production area with 400 square meters and a sterilization area.

The production areas are listed as below:

1. Injection and Extrusion area (Clean Room)
2. Assembly Clean Room, which is divided into:
 - Assembly area
 - Face mask area
 - Packaging machines area
3. Gel mixing area
4. Stitching area
5. Sterilization area

Manufacturing

Surgical Gowns

- Excellent water repellent Breathable Spun bond melt blown material.
- Reinforced and non-Reinforced.
- All sizes, Small, medium, large, X-large, XX-large.
- Double wrapping sterilization pouches.

Surgical Procedures Packs

- Complete product range for all surgical procedure disciplines.
- Flexible and customized components to match different customer needs.
- Lint free superior quality materials.

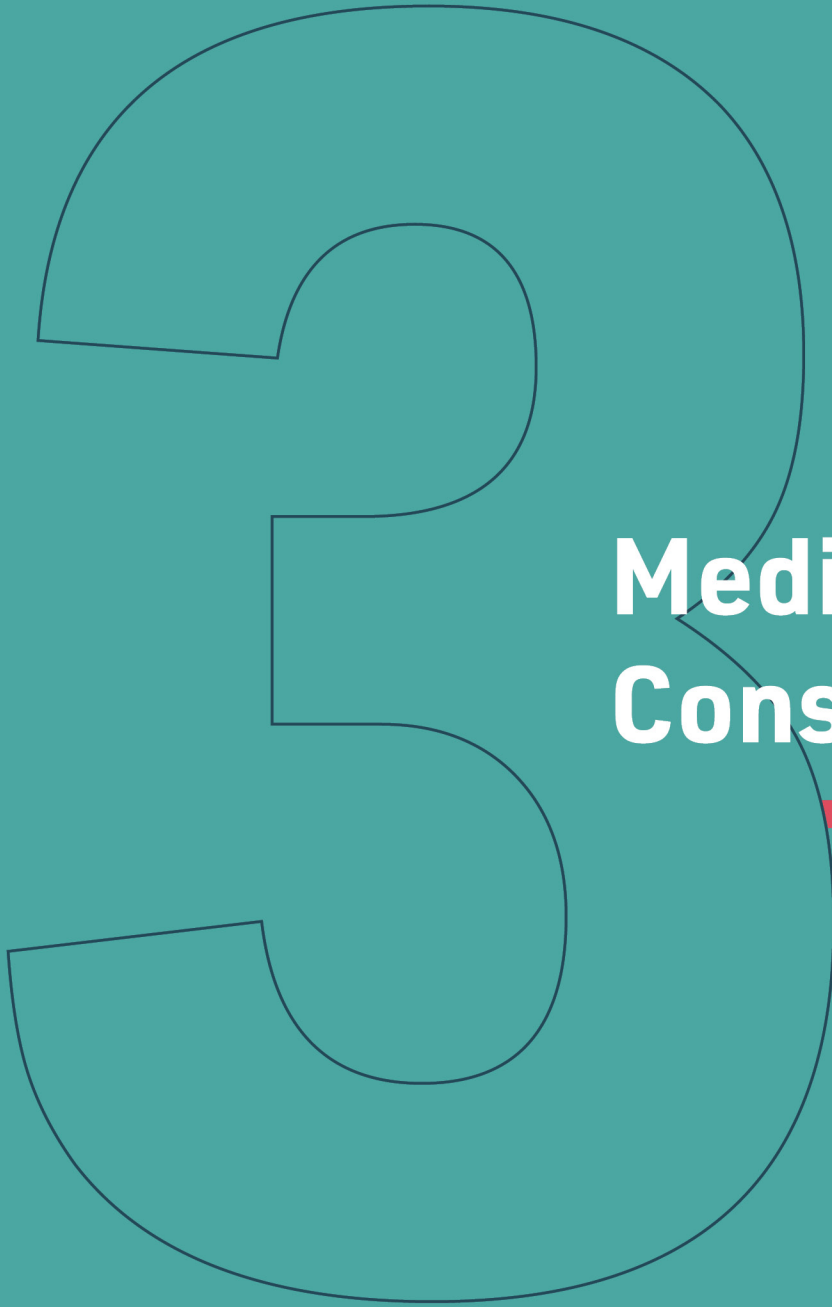

IV & Blood Administration Sets

- Full product range including Venting & non-venting latex-free superior quality sets.
- Smart site injection sites available.
- Different burette sizes available 100ml, 150 ml.
- Syringe extension lines available for neonates and adults.

Catheter Suctions

- Straight with fingertip control / Graduated.
- Lateral eyes for maximum suction efficiency.
- Soft whistle tip for easy smooth insertion.
- Color-coded.

**Medical
Consumables**

With over 35 years of experience, Flexicare has supported clinicians worldwide to enhance patient outcomes with class leading devices. Flexicare is a leading designer and global provider of medical devices. Headquartered in the UK, our global network of **15** subsidiaries supports over **105** countries with dedicated in-market clinical experts and customer service centres.

Anaesthesia Circuit

Flexicare (Group) Limited offers a comprehensive range of anaesthesia breathing circuits designed for adult, paediatric, and neonatal patients. The Portfolio includes multiple tubing configurations to support diverse clinical needs, while incorporating sustainable innovative designs that enhance therapy delivery and help improve patient care.

LarySeal™ Pro

For rapid and secure airway management, improved patient safety with gastric access to reduce risk of pulmonary aspiration, and fast and accurate ET tube placement with a unique guide system.

Single-Use Manual Resuscitators

Ergonomic, single-use Manual Resuscitators with higher levels of Oxygen delivery and pre-fitted components in quick-to-open packaging, provide fast effective care, even in the most difficult situations.

BMC Medical Co., Ltd. (BMC) was established in Beijing, China in 2001, was built to partner with families worldwide to overcome the discomfort of chronic respiratory disease with quality products, professional services and proactive care. Over the past 20 years, BMC helps people in more than 100 countries and regions around the world to sleep better and breathe easier.

CPAP Full Face Mask

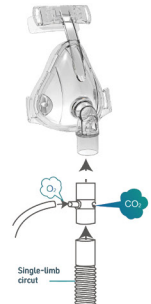

Multifunctional NIV Interface Kit

F3 with elbow "V" is able to be used with CPAP/BPAP device.

F3 with elbow "NV1" is intended to be connected with the ventilator through a single-limb circuit.

In this case, an additional auxiliary venting connector is always needed, such as the swivel connector.

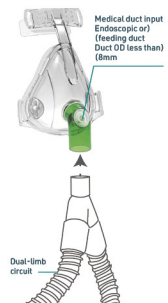

F3 with elbow "NV2" is designed for the dual-limb-circuit ventilation (inspiratory limb & expiratory limb).

F3 with elbow "NV3" is designed for the dual-limb-circuit ventilation as well.

In addition, a medical cannula, such as the endoscopic duct, with an external diameter less than 8 mm, can be inserted through the port on the green elbow.

Medical Consumables

VacSax is the UK's leading supplier and manufacturer of Consumables suction systems, founded in 1997.

Based in Plymouth UK, VacSax has the largest and most comprehensive product range available in the Consumables suction market.

The business has an innovative and expanding product base and a strong track record of growth.

From product design through to dispatch VacSax is unrivalled in its dedication to excellence.

VacSax BactiClear®

Antimicrobial Suction Liners & Fluid Management System

The only system where all external surfaces are totally antimicrobial, designed to minimize the risk of cross-infection..

Medical Consumables

Medline is the largest manufacturer and distributor of medical supplies. We focus on technologies that drive both quality and cost efficiency at every point in the supply chain. So, you can trust that you're getting the best quality products and solutions for the best possible price, serving more than 300,000 plus products in more than 125 countries with an annual turnover of 20 billion USD plus.

Medline EMPOWER Packaging

Sophisticated Process, Simple results

Medline designers together with our clinical team spent hundreds of hours in hospitals across the United States, observing and interviewing central supply managers, OR directors, nurses, scrub techs and others. Then we applied the principles of intuitive visual design to create an entirely new approach to packs: Medline's EMPOWER Packaging System.

Medical Consumables

UltraCare Adult Incontinence Briefs

- Ultra-absorbent core with odor protection wicks away fluid to promote dryness and help maintain skin integrity for long-lasting protection.
- Cloth-like outer cover provides a soft natural feeling on the skin and discreet fit.
- Skin-safe closures offer secure, repeated refasten ability.
- The moisture alert wetness indicator changes color when the garment is wet.

Medline Examination Gloves

Medline SensiCare Nitril

SensiCare Nitril Blue powder-free gloves offer dependable strength, Comfortable and secure fit even during difficult procedures Sensi Care Nitril Gloves are Textured fingertips for enhanced grip, Color-coded sizing on each box helps you quickly identify the right size every time Which Meet both ASTM D6978-05 and USP 800 Personal Protection Equipment requirement for use of chemotherapy gloves when handling hazardous drugs

Medline Curad Latex

Medline Curad® Latex Exam Gloves are non-sterile, powder-free gloves that provide excellent barrier protection with a comfortable fit and natural feel. Fully textured for a secure grip, they offer superior elasticity, strength, and tactile sensitivity, making them ideal for procedures requiring precision. The powder-free design also supports hand health by enhancing staff safety and reducing germ transmission.

Helps. Cares. Protects.

For 200 years, **HARTMANN** has proudly channeled its clinical and medical expertise into smart solutions that are accessible to everyone. HARTMANN will continue to be a partner to healthcare institutions while strengthening its outpatient activities even more.

HARTMANN offers wound treatments that make health economic sense and bring simplicity to patients and caregivers' lives.

Zetuvit[®]

Plus Silicone Border

Superabsorbent dressing (SAP) with silicone adhesive and border.

Medical Consumables

Effective

- Reduces wound inhibitor factors (MMP activity).
- Avoids leakage and prevents periwound skin damage.

Versatile

- Suitable for moderate to high exudate levels, while maintaining optimal microclimate.
- Simple & intuitive application.

Patient-friendly

- No fear of odor and leakage.
- Atraumatic dressing changes thanks to silicone contact layer.
- Comfortable padding and protection against mechanical shocks with unique combination of cellulose and SAP.

CovaView™ IV

Transparent iv dressing

IV Clear®

Antimicrobial clear silicone adhesive securement dressing with chlorhexidine and silver

External Protection

- Barrier to external contamination
- Fluid impermeable

Convenient

- 2-piece liner and tabbed paper frame for easy application
- Window delivery for positioning accuracy
- Easy to apply
- All-i-one securement system minimizes training requirements

Antimicrobial Protection

- Transparent and breathable film with dual antimicrobials-chlor hexidine and silver, embedded in the soft silicone adhesive
- Provides antimicrobial throughout the entire surface area for up to 7 days
- Kills on average 99.99% of bacteria and yeast commonly associated with CRBSIs⁵

Soft Silicone Adhesive

- Allows visibility of insertion site
- Reduces pain and trauma at dressing changes
- Highly breathable, constantly transfers excess moisture

Medical Consumables

MicroSafe[®]
Group

MicroSafe With a Passion for Healing, The MicroSafe Group is a global healthcare leader that produces and develops best-in-class products. Our premiere Stabilized Hypochlorous Acid (HOCl) solutions and gels are utilized around the world to treat various skin conditions and wounds and as disinfectants and sanitizers.

Dermacyn[®] Wound Care

Antimicrobial wound-irrigation solution, Dermacyn[®] is the first revolutionary stable patented HOCl formulation Indicated for the treatment of all types of chronic, acute and burn wounds; Dermacyn[®] Wound Care irrigation solution has outstanding antimicrobial power. Dermacyn[®] Wound Care eliminates the unpleasant odors that often occur in infected wounds with excellent efficacy – and within just a few minutes of exposure to Dermacyn[®].

The Dermacyn[®] Wound Care effect has been proven under clinical conditions: Hypochlorous acid (HOCl) is known to reduce microbial load, reducing the growth of microorganisms, including Staphylococcus aureus (MRSA) & Enterococcus.

MICROCYN® WOUND & BURN HYDROGEL

World's First Broad Spectrum Anti-Microbial Hydrogel Safe as Saline; Microcyn is a Broad Spectrum Anti-Microbial Hydrogel that belongs to a new class of anti-skeptics known as Super-Oxidized Solution. Microcyn is a clear, viscous, odorless, aqueous hydrogel that is pH-neutral, non-irritating, non-sensitizing, and non-cytotoxic to granulation tissue.

For the treatment of all types of Chronic and Acute Wounds as well as all types of Burns.

MicroSafe®

The microsafe high level hospital grade surface disinfectant and sanitizer

- EPA registered as Toxicity category IV (Non-Toxic and not an irritant).
- The most approved and most tested 100% natural technology of its kind available globally.
- The new standard in infection control, the leader in a new class of disinfectants and the most advanced disinfectant in the world.
- The result of a biotech breakthrough almost 20 years ago with unmatched properties is 100% natural and without harmful chemicals.

Created in 2003 with the desire to invest in the fight against nosocomial infections in an eco-responsible manner, OxyPharm manufactures and distributes biodegradable machines and products for automated surface disinfection as well as disinfection.

NOCOSPRAY

Nocospray is a light and portable aerial surface bio-disinfection device. It ensures aerial surface disinfection or disinsectisation when used along with our Nocolyse or Oxypy ranges. A dry fog allows a uniform treatment of every cm² surfaces, as a preventive or curative measure.

Treatment of volumes from 10 to 1,000 m³.

Glosair

The Glosair solution is based on the dual action of an automated surface treatment, The GLOSAIR machine uses the concept of a heating and ioni ng turbine that diffuses the liquid disinfectant in the form of a dry mist. This prevents any corrosion of the treated surfaces. The volume of the room to be treated (from 10 to 2000 m³) with the option to delay the start, and consult the history of last treatments performed.

Medical Consumables

HELIOSCOPIE has been established in France, since 2000 where it designs, manufactures and markets class I to III implantable medical devices, specialising in the surgical or endoscopic treatment of obesity.

HELIOSCOPIE positions itself on minimally invasive and reversible techniques with devices or accessories adapted to the treatment of obesity but it more generally has expertise in the field of wall reinforcements (ventral hernia repair, hernia, etc.) or urinary incontinence.

Medical Consumables

mindray

healthcare within reach

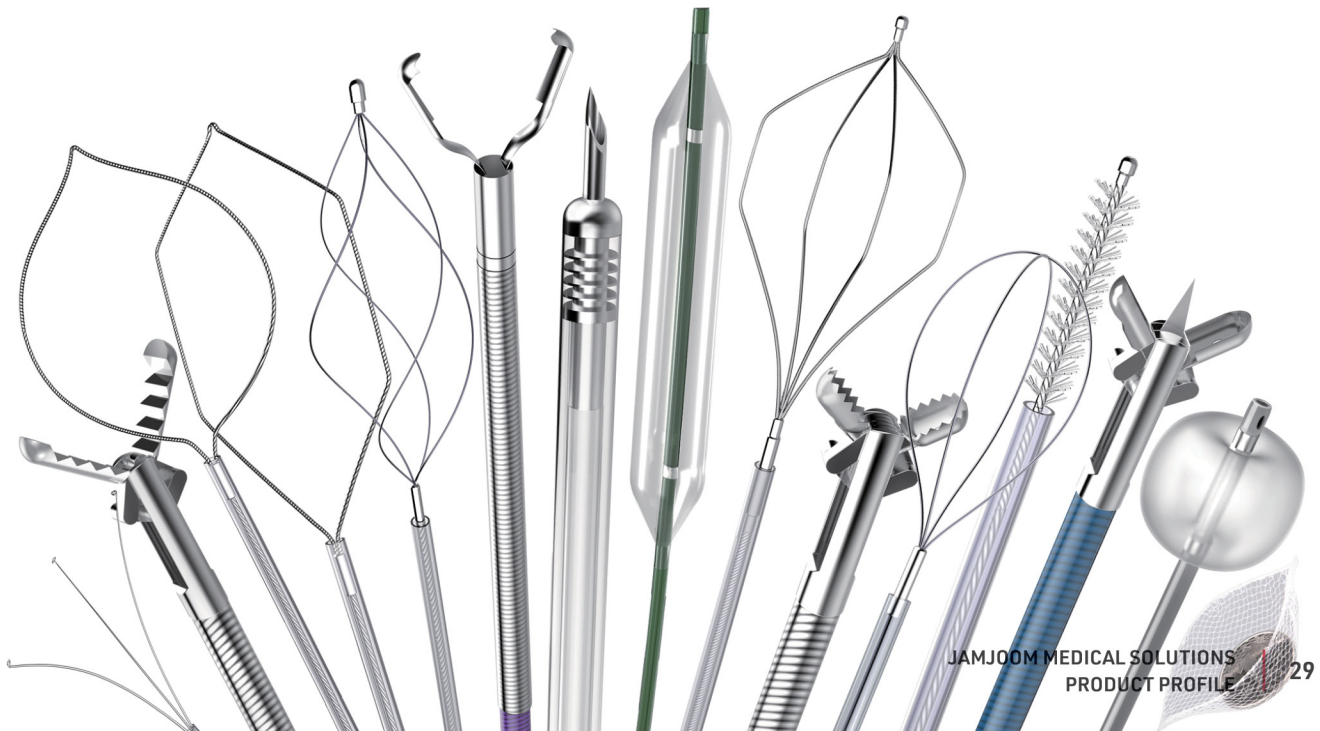

Mindray's minimally invasive surgery solution includes both the endoscope camera system and laparoscopic instruments. By providing a high-quality imaging system, Mindray extends the function of doctors' eyes to see more details, and by providing Consumables instruments and reusable instruments, Mindray extends the function of surgeons' hands to practice various delicatated operations.

Vedkang Medical is one of the leaders that develop, manufacture, and market high-quality endoscopic devices. Our product lists include ESD products, ERCP products, and basic GI endoscopic treatment products, which have been distributed to more than 80 countries worldwide.

Founded in 2003, with more than 750 employees, our mission has always been to innovate for health: to make surgeries easier and patients safer. In 2020, Vedkang Medical gained the China Science and Technology Entrepreneurship Contribution and National Model Medical Device Enterprise Award.

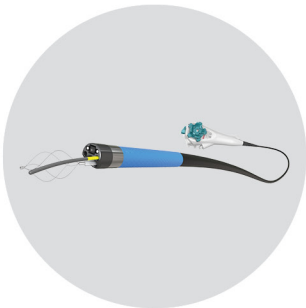

Medical Consumables

VedVision

Cholangioscope

Direct Visualization System enables direct visualization of the bile and pancreatic ducts and can help obtain biopsy specimens, lead to the diagnosis of abnormalities, and guide stone therapy.

Various functions, such as flushing, suction, lithotripsy, collection of biopsy specimens, etc., and can also be used to diagnose and treat the intrahepatic area, external bile duct, and pancreatic duct under direct visualization.

VedVision

Ureteroscope system

- **>275°**

Flexible passive bending supports maneuverability during lower calyx procedures.

- **Passive bending**

Provides easier forwarding with decreased compression, reducing discomfort and trauma.

2.5 mm (in max of insertion part) 7.5fr O.D. provides smooth insertion and reduced renal pressure.

- **Rotatable Rotation**
control facilitates easy and accurate angle adjustment.

- **Independent laser channel**

Supporting more efficient intervention. Research suggests that Holmium laser Stone removal is effective in over 80% of cases.

2 multifunction buttons Buttons A&B can be customized to your preferences (Image Capture, video or image switching).

KANGJI

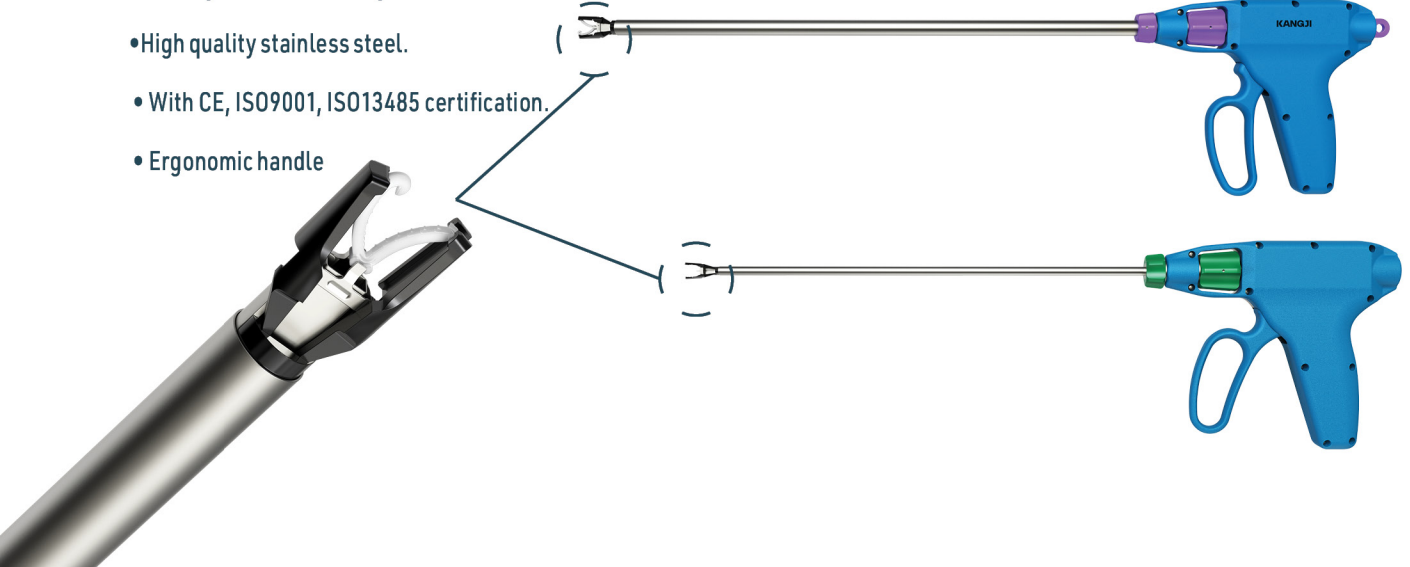

Founded in 2004, as the biggest domestic MISIA (Minimally Invasive Surgical Instruments and Accessories) platform, **Kangji** Medical provides surgeons and patients with comprehensive, high quality, reliable and accessible total minimally invasive surgical solutions for general surgery, gynecology, urology and thoracic surgery specialties globally. **Kangji** Medical strives to develop, manufacture and offer robust and reliable surgical products to help to deliver surgeries with better clinical outcomes and cost effectiveness. The company went public in Hongkong in June 2020, marking a fresh start for its exploration and innovation in the field of the minimal invasive field.

Founded in 2013 in South Korea, BCM Co., Ltd is a specialized developer and manufacturer of innovative endoscopic medical devices, focused on improving patient quality of life.

After launching its HILZO Stents and HILZO Devices lines in 2015, BCM has achieved strong, sustained growth in a highly competitive endoscopy market

HILZO Stents

Comprehensive range of self-expandable metallic stents for the biliary, esophageal, pyloric/duodenal, colonic and ureteral tracts, designed to support effective palliation and luminal patency in challenging GI and urological cases

MEDICO ELECTRODES INTERNATIONAL LTD is one of the leading manufacturers of Consumables ECG Electrodes for all cardiac monitoring and diagnostic procedures.

With a constant endeavor to grow, in 2015 Medico acquired 100% shares of a UK-based manufacturer of Tab Electrodes, Electrosurgical Plates, and Hydrogel. The Acquisition consisted of two manufacturing plants in Warwick, thus providing a multi-national base to the company.

With the Acquisition, we are able to offer the following range of Products

A. Consumables ECG Electrodes.

B. TAB Electrodes.

C. TENS Transcutaneous Electrodes.

D. Hydrogels adhesive gels.

MSGST-07

MSGST-35M

MSGST-11

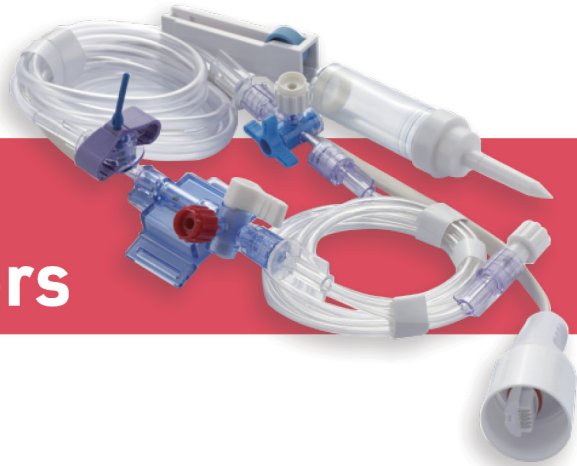

Medicath
Ltd.

SCW MEDICATH LTD established in 1996 and headquartered in Shenzhen, is the first factory to develop and manufacture Central Venous Catheters and Pressure Transducer in China.

As a professional medical manufacturer, SCW has been specialized in the field of Intervention, Anesthesiology & Critical Care, and other high-value medical supplies.

Consumables Pressure Transducers

- Medical pressure transducers are specialized medical transducers that can sense pressure and convert it into digital or other types of output signals.
- The IBP transducer is indicated for monitoring kinds of pressure such as central venous pressure, pulmonary artery pressure, and atrial pressure to get the physiological pressure.
- Strong adaptability, can be used with monitors of major brands, such as Mindray, Philips, Draeger, GE, Space, Edward, etc.
- Complete specifications and models, including single-head, double-head and three-head.

We are Actim, one of the subsidiaries of the Finnish biotechnology group Medix Biochemica. Our company specializes in developing and manufacturing innovative rapid diagnostic tests intended for healthcare professionals. At Actim, we help people around the world receive better care through timely diagnoses.

Actim[®] PROM

Rapid bedside test for premature rupture of membranes (PROM) at any gestational age, delivering clear results in just 5 minutes.

Actim[®] PROM Benefits

- Supports fast, confident decision-making in uncertain PROM cases.
- Reduces unnecessary admissions, interventions, and related costs.
- Helps prioritize high-risk patients and optimize use of clinic / hospital resources.

Clinical Nutrition

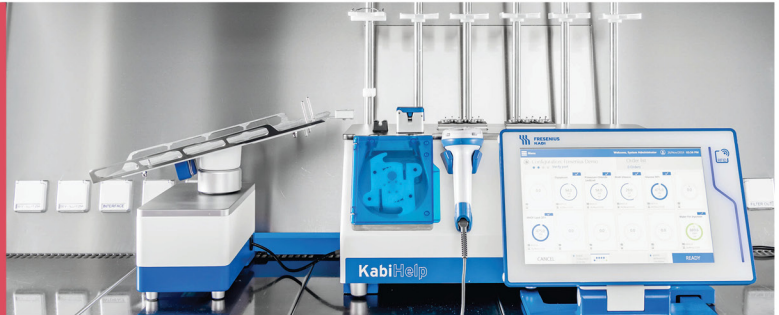

Clinical Nutrition

Fresenius Kabi is a global healthcare company that specializes in lifesaving medicines and technologies for infusion, transfusion and clinical nutrition. The company's products and services are used to help care for critically and chronically ill patients.

KabiHelp® Pro PN Compounding Solution

- 12" Touch screen.
- Volumetric delivery, and high-precision gravimetric check with the built-in Sartorius scale.
- Macro and micro ingredient mixing.
- Air and occlusion detection.
- 24 Ports.
- Developed according to Medical Device Standards.
- GS1* barcode standard support.
- Built-in LAN and Wi-Fi interfaces.
- Supporting syringes and vial source containers.
- Endotoxin and DEHP**[†]-free tubing.

Clinical Nutrition

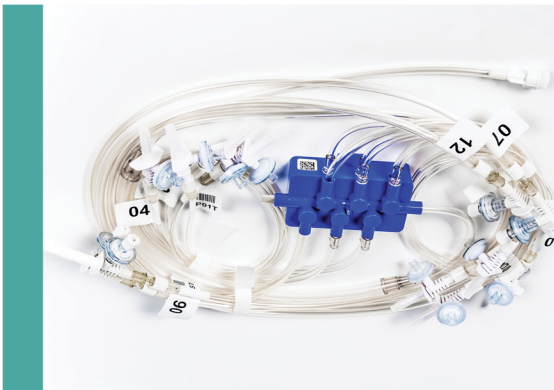

KabiHelp® Pro

Bags and Accessories

Bags One-chamber

- Available in EVA* and MultiLayer material.
- Available in sizes from 150 mL to 5000 mL.
- DEHP-free.
- Safe handling.

Transfer Sets

- Available in preassembled versions with inlet barcode on all ports.
- 24 port.
- Compatible with syringes, macro and micro source containers:
 - _ Double sterile packed.
 - _ Safe handling.

Medcaptain Medical Technology Co., Ltd.

was established in 2011, and its business involves Medication Delivery, Minimally Invasive Interventions, Anesthesia and respiratory, In-vitro Diagnostics and other fields.

Medcaptain is committed to leading scientific and technological innovation, constantly improving and perfecting products and solutions, so that more people can benefit from high-quality medical services.

The Integrated Perioperative Solutions Provider is closer to healthcare needs and innovates medical technologies, to provide high-quality services.

Closed Suction

Closed Suction Catheters. Depth level indicators for easy positioning of the catheter. Reducing the risk of cross-contamination and keeping the patient's high PEEP level without disconnecting the patient from the ventilator during suction.

Clinical Nutrition

EP-60 Enteral Feeding

EP-60 Enteral feeding pump. Easy to feed. Safe to use. Integrated enteral feeding system by providing enteral giving sets.

- Enteral Feeding System.
- 4.0 Touch Screen.
- Optional Heater
- Auto Anti Occlusion.
- Robust Housing.

Offer sets with ENFit or luer connector to assist you in going through the ENFit transition phase smoothly. Fully compatible with Medcaptain enteral feeding pump.

Medical Equipment

Medical Equipment

mindray

healthcare within reach

As high-quality and advanced healthcare in most situations is still not affordable for most people.

Mindray's believes it's time for the healthcare industry to give every life respect and put patient care first.

Innovation has been rooted in Mindray's blood since the company was founded 30 years ago, Mindray covered 110,000+ medical Institutions in China, Over 99 tertiary hospitals in China 685,940+ units Installed, 447,000+ patient monitors, representing 36+% market share.

Mindray's China Public Healthcare coverage started at 24.6% and is now 97%, Diagnosis and Treatment (annual) from 2,145 million and reached 7,800 million, Medical Institutions coverage from 290,000 - 993,000, Medical device market volume USD 8 billion and reached USD 54.4 billion.

Mindray's have a firm's experience of managing both American and Chinese researchers is revealing. Its researchers in Silicon Valley are not just tutoring their counterparts in Shenzhen, it turns out, but also learning from them.

Mindray's have 8,300+ professional employees from 40+ countries, International branches in 30+ countries, with 44 branches in China, Serving 190+ countries and regions. Mindray systems are in use at 9 of the top 10 USA cardiac hospitals Mindray covers almost of medical devices worldwide which are as follows: Patient Monitoring and Life Support, Medical Imaging Systems, vitro diagnostics, Hematology, and Surgical equipment.
